## EXPERIENCE

---

### HackForLa

Remote

Software Engineer (Contributor, Volunteer)

May 2024 - Present

- Contributed to open source collaboration following a Kanban workflow to help build and maintain the HackForLA website
- Regularly assisted in reviewing pull requests for other volunteers to ensure quality implementations of updates to the website
- Collaborated and

### Springboard

Remote

Software Engineer Trainee

Jan 2023 - April 2024

- Completed 700+ hours of hands-on course material, with 1:1 industry expert mentor oversight, and completion of 4 in-depth portfolio projects.
- Mastered skills in front-end and back-end web development, databases, and data structures and algorithms
- Acquired proficiency in modern dev tools such as JavaScript, Python, SQL, Node, React, Flask, Express, jQuery
- Refined skills in web development, testing code, and understanding data structures and algorithms

## PROJECTS

---

### WhichAni.me

- Built a web app allowing users to create and interact with anime recommendation lists
- Designed an aesthetic and easily navigable UI using HTML/CSS, Jinja2, jQuery and Bootstrap
- Developed back-end and database with Flask, Python, SQL, SQLAlchemy and PostgreSQL allowing authorized users to create, edit and delete lists
- Built a system to create a list of randomly generated anime catered to user preferences provided through a website quiz

### Jobly

- Designed a job searching website allowing users to search for and apply to jobs
- Utilized React to build a user-friendly, navigable front-end interface
- Developed a back-end Express API which allows users to interact with the database when signing up and applying for jobs

## EDUCATION
